

MATERIALS SCIENCE & METALLURGY

Materials Science & Metallurgy laboratory is devoted to fundamental understanding of materials, their structure and the relationship between them. The laboratory incorporates Non-destructive testing methods for detecting and evaluating flaws in materials. The facilities available in laboratory includes

1. Rockwell cum Brinell hardness
2. Single Disc Polishing m/c
3. Specimen mounting Press
4. Jominy End Quench Apparatus
5. Metallurgical microscopes
6. Muffle Furnace – 1200 OC
